## Quality, Health & Safety, Environment

**Finally, we have the safety certificate for main railway lines (working with a self-propelled machine on or next to the main railway line or a part of a main railway line that has been taken out of service for this purpose).**

Strukton Infratechnieken is certified for level 5 on the CO2 performance ladder. The CO2 performance ladder encourages companies taking part in tenders to work with an awareness of the CO2 emissions they create. Both in the way they operate as a company and also in carrying out projects. A higher level on the CO2 performance ladder means that they will have a better chance of being awarded a project.

#### **Certification for the CO2 performance ladder depends mainly on:**

- energy saving
- making efficient use of materials
- the use of sustainable energy
